

PRESS RELEASE

Entry Level Support Stand for Lab Reactors

Asynt announces its newest member of the ReactoMate reactor family, the “**QUANTUM**” **support stand** is the perfect addition to any process chemistry laboratory.

Designed to be an affordable entry-level system - QUANTUM is easy to set up and provides secure and stable support for all reaction vessels from 100ml right up to 5,000ml. Manufactured in the UK using durable stainless steel - QUANTUM does not compromise on quality.

Fully compatible with all leading brands of overhead stirrer and with reaction vessels you may already have in your lab – QUANTUM support stands are a versatile and sound investment.

For further information on the QUANTUM support stand please visit <https://www.asynt.com/product/reactomate-quantum-support/> or contact Asynt on +44-1638-781709 / sales@asynt.com.

Available in both pilot and bench-top scale systems, ReactoMate controlled laboratory (CLR) reactors are proven to provide precise control of reaction variables. A wide range of Asynt single and vacuum jacketed reaction vessels can be exchanged on ReactoMate CLR systems, allowing chemists to quickly change between reactor vessel sizes, thereby accelerating synthesis scale-up.
